Chapter 7: Transportation Innovations

Ride-Sharing Services and AI

When you need a ride, you simply open the app, and within moments, it locates drivers close to your location. This technology works quietly behind the scenes, analyzing data such as where you are and the current locations of drivers. Imagine you are at a coffee shop and want to go to the grocery store. You select your destination, and the app finds the nearest available driver who can pick you up in just a few minutes. This fast connection helps reduce waiting times, which is especially important if you have a busy schedule or need to get to an
